A SELECT LIST

OF

HYACINTHS, TULIPS, CROCUS,

AND OTHER CHOICE

TUBEROUS-ROOTED PLANTS,

OFFERED BY

WILLIAM BULL, F.L.S.

EARLY ORDERS ARE RESPECTFULLY SOLICITED TO ENSURE FINE BULBS.

For the convenience of purchasers who do not wish to choose their own sorts, Mr. W. BULL will have much pleasure in making suitable and liberal selections of the finest and most distinct free-blooming varieties.

HYACINTHS.

CULTURE.

The bulbs should be potted in soil composed of equal parts of cow manure, good loam, and river sand. This compost should be prepared in April or May, and afterwards turned over two or three times. If this cannot be had, the soil which has been used in a hothouse for growing Cucumbers, Tomatoes, etc., is a good substitute, and is superior to freshly-made soil.

Immediately after potting, which may be done from September to December, place out of doors on a bed of ashes, and cover the pots with six inches of the same material, or cocoa fibre is preferable; there let the pots remain till full of roots, which will usually be about six or eight weeks. If very early flowers are required, pot in September, and when sufficiently rooted force gently, and give abundance of water; but if large finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth must not be forced, but when removed indoors should be placed on the shelf of a greenhouse, or in a cold frame, close to the glass, always in the most genial and sunniest situation at command, and the plants allowed to develop their flowers gradually and naturally, giving water regularly and freely; as it is well known to cultivators that failures, for the most part, arise from allowing the soil to become dry, when the rootlets are in consequence injured. Abundance of air is necessary, but a dry atmosphere and a draughty situation should be sedulously avoided.

If the Hyacinth is cultivated in glasses, the base of the bulb should just touch the water, and a little charcoal should be placed in the glass to keep the water sweet. The glasses, if possible, should be kept in a room without a fire, or better still in a greenhouse.

ORIENTAL LILY OR "JOSS FLOWER."

Water Fairy Flower

(Chinese Emblem of Good Luck).

This variety is grown by the Chinese, and called by them "Joss Flower," Flower of the Gods; or Water Fairy Flower. The bulbs are specially grown, and attain great size and strength; the flowers, which are borne in clusters, on tall spikes, are white with a golden yellow centre and deliciously fragrant. 5s. per dozen.

POLYANTHUS NARCISSUS.

These have the fragrance of the Jonquils, and are useful for indoor decoration; they are of easy culture, and can be forced early, particularly the Double Roman and Paper White, which may be had in bloom at Christmas: two or three bulbs are recommended to be planted in one pot, so as to produce a fine mass of flowers.

IRIS KÄMPFERI.

IRIS KÄMPFERI.

Many magnificent varieties of this handsome and attractive plant have been imported from Japan; indeed scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. Some are pure white with delicate reticulations of lavender, others are beautifully maculated with rosy-purple on a light ground, while many beautiful shades of dark crimson, blue, purple, and violet will be found amongst them. They succeed admirably planted on the margin of a lake or pond, or in any situation where plenty of moisture can be given. 2s. 6d. and 3s. 6d. each; 24s. and 36s. per dozen. GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some:—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

During excessively dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentioned above, they should be potted and kept in a cool frame until the proper season for planting out.

LEMOINE'S GLADIOLUS.

This beautiful tribe of plants should be largely planted everywhere.

Orders are booked throughout the year at the following prices, and the bulbs supplied in January, February, or March.

BRENCHLEYENSIS.

This beautiful and showy bright scarlet species is most effective when planted in quantity in beds or borders.

Selected bulbs, 6s. 3d. per 100, or 60s. per 1,000.

GLADIOLUS NANCEIANUS.

A grand new and distinct race of Gladiolus, raised from a cross effected between *G. Saundersii* *G. Lemoinei*. The flowers are of enormous size, and for beauty surpass all others. They are as hardy as the Gandavensis section.

Finest varieties, named, 12s., 18s. and 24s. per dozen.

GLADIOLUS CHILDSII.

This remarkable section of Gladiolus is most vigorous in growth, attaining a height of from 4 to 5 feet, the spikes of bloom being about 2 feet in length, and the individual blossoms of great substance and gigantic size, the colours most pleasing and varied.

Finest mixed, 6s. per dozen; 40s. per 100. Fine named varieties, 12s., 18s. and 24s. per dozen.

GLADIOLUS, "SNOW-WHITE."

A magnificent White Gladiolus, with large and elegantly formed flowers of great substance slightly shaded with cream, a faint line of purple extending half-way through the lower petal.

10s. per dozen.

GLADIOLUS, "THE BRIDE."

(*G. Colvillei albus*).

The beautiful and chaste pure white flowers of this early flowering Gladiolus, make it an essential, wherever cut flowers are required. It is easily forced, and the flowers last a long time after being cut.

3s. per 100; 24s. per 1,000.

GLADIOLUS. EARLY-FLOWERING VARIETIES.

GLADIOLUS, THE BRIDE.

For grace and beauty these compare favourably with any other section of the Gladiolus. They embrace the most delicate and beautiful combinations of colour, are of dwarf branching habit, free blooming, flowering from June to August, or by gently forcing will bloom in April or May. They are specially adapted for growing in pots for conservatory decoration in the spring and early summer. Invaluable for cutting, the flowers lasting a long time when placed in water.

AMARYLLIS BELLADONNA.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then, when required, if started in a gentle heat, they quickly develop their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

Choice selections of good sorts, 2, 3, 4 and 6 guineas per dozen.

AMARYLLIS BELLADONNA.

(The Belladonna Lily.)

These beautiful hardy bulbs have large handsome bluish flowers, richly flushed with rosy purple, rendering them extremely useful for greenhouse and conservatory decoration. 6s. and 9s. per dozen; 40s. to 60s. per 100.

AMARYLLIS IGNESENS.

This distinct and ornamental species is one of the most handsome of stove bulbs. It is very free-blooming, and bears on erect scapes umbels of fiery orange-scarlet flowers. 2s. 6d. and 3s. 6d. each. 18s. and 30s. per dozen.

AMARYLLIS LUTEA.

(Sternbergia lutea.)

A beautiful rich golden yellow flowering species, blooming in the autumn. 1s. 6d. per dozen; 10s. 6d. per 100.

AMARYLLIS FORMOSISSIMA.

AMARYLLIS FORMOSISSIMA.

A very handsome bulbous plant, freely producing magnificent flowers of a very rich dark velvety crimson. This distinct and attractive Amaryllis is very suitable for growing in pots, and is always interesting, owing to the rich colour and peculiar shape of its flowers. *See illustration.* It will succeed well in a warm greenhouse. 6d. each; 5s. 6d. per dozen.

ANTHERICUM LILIASTRUM MAJUS.

ANTHERICUM LILIAGO (*St. Bernard's Lily*), white, 2s. 6d. per dozen.

— **MAJUS**, 9d. each; 7s. 6d. per dozen.

— **LILIASTRUM** (*St. Bruno's Lily*), white, 9d. each; 7s. 6d. per dozen.

— **MAJUS**, 1s. and 1s. 6d. each; 10s. and 15s. per dozen.

CYCLAMEN AFRICANUM.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks. 9s., 12s. and 18s. per dozen. Flowering plants, 24s., 30s. and 42s. per dozen.

CYCLAMEN AFRICANUM, a handsome, hardy species, with large ornamental leaves. Flowers bright reddish crimson. *Vide* illustration. 1s. each; 10s. per dozen.

CYCLAMEN EUROPEUM, red, sweet scented, quite hardy (*vide* illustration), 4s. per dozen.

— **COUM**, bright red, 6s. per dozen.

— **CACTUS-FLOWERED VARIETIES.** 9s., 12s. and 18s. per dozen.

SPIRÆA ASTILBOIDES.

SPIRÆA JAPONICA COMPACTA MULTIFLORA.—This most desirable variety is a great improvement on the old *S. japonica*, as it produces a profusion of large and dense spikes of pure white flowers, in telling contrast to the dark green foliage of the plant, the habit of which is dwarf and compact. 6d. each; 4s. 6d. per dozen.

SPIRÆA PALMATA.—The bright pink Japanese Spiræa, producing lovely broad corymbs of pink flowers. 6d. each; 4s. 6d. per dozen.

SPIRÆA PALMATA ALBA.—A counterpart of *S. palmata*, except in the colour of the flowers, which are pure white; a very beautiful and elegant variety. 9d. each; 6s. per dozen.

SPIRÆAS.

SPIRÆA ASTILBOIDES.—Charming and indispensable plant for pot culture, its beautiful flowers being produced in the greatest profusion. 9d., 1s. and 1s. 6d. each; 7s. 6d., 10s. and 15s. per dozen.

SPIRÆA ASTILBOIDES FLORIBUNDA.—Produces thyrsoid spikes of bloom, much crowded with flowers. 1s. each; 10s. per dozen.

SPIRÆA (HOTEIA) JAPONICA — Most useful for decorative purposes. Strong clumps, 5s. per dozen.

SPIRÆA JAPONICA AUREO-RETICULATA.—Pretty variegated foliage, added to which it bears a profusion of handsome compact spikes of pure white flowers. 9d. each; 7s. 6d. per dozen.

TIGRIDIAS.

CONCHIFLORA, yellow, spotted with purple. 1s. 6d. per dozen; 10s. 6d. per 100.

GRANDIFLORA (speciosa). 1s. 6d. per dozen; 10s. 6d. per 100.

— **ALBA**, beautiful white-flowered variety. 1s. 6d. per dozen; 10s. 6d. per 100.

— **IMMACULATA**, differs from the preceding by the absence of the crimson spots in the centre; the flowers being totally white. 2s. 6d. per dozen; 15s. per 100.

— **AUREA**, deep golden-yellow flowers. 2s. 6d. per dozen; 15s. per 100.

— **LILACEA**, purplish lilac, with white and purple spots in centre. 2s. 6d. per dozen; 15s. per 100.

— **ROSEA**, flowers of a lovely bright rose colour, very charming. 2s. 6d. per dozen; 15s. per 100.

PAVONIA, red and orange. 1s. 6d. per dozen; 10s. 6d. per 100.

PENTAPHYLLUM. 1s. 6d. each.

POLYPHYLLUM. 6d. each; 4s. per dozen.

SPECIOSUM.—Handsome crimson flowers. 6s. per dozen.

TRICOLOR GRANDIFLORUM (Jarattii). 6d. each.

TUBEROSUM.—Flowers scarlet and yellow; very attractive and decorative for open-air cultivation. 3s. per dozen; 4d. each.

SINGLE-FLOWERED BEGONIA.

DOUBLE-FLOWERED BEGONIA.

BEGONIAS.

HANDSOME FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive.

SINGLE-FLOWERED.

Selections of good single-flowering named varieties can be made by Mr. W. B. at 12s., 18s. and 24s. per dozen.

Single-flowered unnamed Seedlings of various colours, 4s., 6s. and 9s. per dozen; 25s., 35s. & 50s. per 100.

For Seed, *vide* page 44.

DOUBLE-FLOWERED.

Named Varieties with double flowers, at 30s., 42s. and 60s. per dozen.

Double-flowered unnamed Seedlings of various colours, 4s., 6s., 9s. and 12s. per dozen; 30s., 35s., 50s. and 75s. per 100.

GESNERAS (NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over-estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty.

Selections of good varieties at 24s. and 30s. per dozen, according to sorts.

CHOICE GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants render them of the greatest value for the decoration of stoves and conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year; their attractive flowers, being of large and good shape, are admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

Choice selections made by Mr. W. B. at 18s., 24s. and 30s. per dozen, according to sorts.

Good blooming tubers, unnamed, of various colours, raised from handsome varieties, 4s., 6s. and 9s. per dozen; 30s., 40s. and 50s. per 100.

GLOXINIA.

GLOXINIA MACULATA INSIGNIS.

Bluish lilac flowers, marked with large crimson blotch at base, 2s. 6d. per dozen.

GLOXINIA, SPARKLER.

A handsome variety with rich bright crimson flowers. 1s. 6d. each; 12s. per dozen.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18s., 24s., 30s. and 42s. per dozen, according to sorts.

PRIMULA SINENSIS FIMBRIATA FL. PL., Mixed.—2s. 6d. and 3s. 6d. per pkt.

These double Primulas are a valuable acquisition, especially to cut from, as they do not drop their flowers like the single varieties.

BULL'S FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense benefit applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneficial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots or planted in the open air.

FOR TESTIMONIALS see next page.

ANALYSTS' REPORT.

The analysis shows this to be a complete Plant Food, and of the highest quality. The material not only contains an abundance of all the constituents necessary for plant growth, but the analysis shows also that the four chief constituents are each in that combination which renders them in the most beneficial and available form for the healthy development of plants.

For these reasons, users of this Plant Food in the proper quantities cannot fail to produce the very best results within the capability of their plants.

CANNON & NEWTON,
Analytical and Consulting Chemists, 39, Mining Lane, London, E.C.

DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.—Sprinkle on the surface of the soil, about every three weeks, at the rate of a small teaspoonful to a 5-inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For CHRYSANTHEMUMS.—At the time of potting, some of the Plant Food should be thoroughly mixed with the compost, and afterwards, when the buds begin to swell, frequent top-dressings should be given, the quantity used being estimated according to the size of the pots and vigour of the plants.

For ROSES, SHRUBS, VINES, &c., in Pots.—Use about a tablespoonful to a 12-inch pot several times during the season.

For PLANTS, FRUITS, ROSES, and all Plants in Borders and the Open Ground.—Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.—Scatter broadcast at the rate of 2 ozs. to the square yard, and well water.

Sold in Tins, containing about 1½ lbs., price 1s. each. Larger Size, containing about 5 lbs., 2s. 6d. each.

Also in Bags, 14 lbs., 4s. 6d.; 28 lbs., 7s. 6d.; 56 lbs., 12s. 6d.; 112 lbs., 20s.

BULL'S FOOD FOR PLANTS.

TESTIMONIALS.

Dear Sir,—I have tried your Plant Food with great success. I consider it the best Plant Food in the Market, its effects are marvellous. Please send me another cwt.

Yours respectfully, JAMES SMART, Gardener to E. R. B. Hall-Watt, Esq.

THE GARDENS, MOUNT MERRION, Booterstown, DUBLIN, 4th December, 1894.

Sir,—I am well pleased with your Plant Food. I grew my Chrysanthemums this year with it, and won four First Prizes, one £20 Cup, and one £10 Cup at the Dublin Show.

Yours truly, HUGH CRAWFORD, Gardener to the Rt. Hon. Earl of Pembroke.

CROFTON, AIGBURTH, LIVERPOOL, 20th February, 1894.

Dear Sir,—After giving your Food for Plants a fair trial for over two years, I must say that I like it better than any Artificial Manure I have ever used. In 1892 I grew my Chrysanthemums with it, which won the 10-Guinea Cup at Grassendale and Aigburth Shows, also the First Prize at Liverpool. In 1893 I was again successful in carrying off like honours. I have used it on hard and soft wooded plants, and the results were everything that could be desired. It has no unpleasant odour, so that, unlike many Manures, is not offensive in the Conservatory.

Yours truly, DONALD FORBES.

HARKESTEAD RECTORY, near IPSWICH, May 10th, 1894.

Dear Sir,—Having used your Plant Food on Chrysanthemums with such good results, I have no hesitation in saying that it is the best Artificial Manure I have ever used, producing flowers of great size and depth, indeed, it is invaluable to those who have to exhibit blooms of the finest quality. One thing greatly in its favour is, that if applied in moderation, anyone may use it without running the risk of injuring the roots or the flowers damping, which is often the case with other Manures.

I am, Sir, yours respectfully, GEORGE JORDAN, Gardener to the Rev. HUGH BERNERS.

IMPNEY HALL, DROITWICH, 18th February, 1893.

Dear Sir,—I am very pleased with the results from using your Plant Food. I grew my Chrysanthemums with it last season, which won the City of Edinburgh Silver Cup, also the three First Prizes for cut-blooms in the large Open Classes at Birmingham, and the First Prizes at Sheffield. I have also used it with excellent results for Strawberries, Melons, Pines, &c. I am now using it on Vine and Peach Borders with every confidence of its producing good results. I shall be glad if you will kindly forward another 5 cwt. and oblige,

Yours truly, RICHARD PARKER, Gardener to J. CORBETT, Esq.

CROSWOOD PARK, ABERYSTWYTH, 17th March, 1894.

Dear Sir,—I am delighted with your Food for Plants. I find it is excellent for Chrysanthemums, Pelargoniums, Fuchsias, Cinerarias, &c., in fact for all soft wooded plants. I also used it on my Vine borders and it enabled young Vines to carry remarkably heavy crops that ripened up well, while the flavour was everything that could be desired. A great advantage is that it has no unpleasant smell, so can be used in the Conservatory.

I am, yours faithfully, R. C. WILLIAMS, Gardener to Rt. Hon. Earl of LISBURN.

OAKLANDS, AIGBURTH, LIVERPOOL, 12th March, 1894.

Dear Sir,—I have much pleasure in stating that I have used your Food for Plants with great success on Vines, Peaches, Roses, &c., in fact I never had better results. For hard and soft wooded plants I can confidently recommend it as a safe and excellent Fertilizer.

Yours truly, JOHN BOUNDS, Gardener to ALFRED L. JONES, Esq.

THE NURSERY, HAMMOND STREET, CHESHUNT, July 18th, 1894.

Dear Sir,—Will you send me 1 cwt. more of your Plant Food, and quote price for quarter ton, as I find my Tomatoes have greatly improved since using it on them, according to the directions. Yours truly, B. SEARING.

THE GARDENS, KEIR, DUNBLANE, BALDOE OF ALLAN, N.B., 8th September, 1893.

Dear Sir,—Your Plant Food is the best I have ever used. I have tried it on various plants with excellent effect, and for stimulating and imparting colour to Crotons and other foliage plants, it is all that can be desired. I tried it on Cyclamens, and the results were marvellous. I took First Prize with these at Edinburgh last year. Kindly send me double the quantity, obliging

Yours truly, THOMAS LUNT, Gardener to ARCHIBALD STIRLING, Esq.

MANOR HOUSE, STRATTON AUDLEY, BICESTER, 9th November, 1893.

Dear Sir,—I have used your Food for Plants for nearly two years, and like it better than any artificial Manure I have ever had. I have used it on my Vines and never had such a good crop. It is excellent for Chrysanthemums, Primulas, Ferns, &c. Please forward me another cwt., and oblige,

Yours faithfully, W. PARKER, Gardener to the Right Hon. Lady ROSE LEIGH.

ST. ANNE'S, CLONTARF, DUBLIN, 2nd March, 1893.

Dear Sir,—I have used many Artificial Manures for plants in the past 36 years, but none that I like so well as your "Plant Food." Not only is it a quick Fertilizer, but it has no unpleasant odour—a great desideratum.

Yours faithfully, CHARLES SMITH, Gardener to the Right Hon. Lord ARDILAUN.

THE DEN, BELFAST, 27th January, 1893.

Dear Sir,—You will doubtless be interested to know that last season I won twenty-three First and ten Second Prizes for plants and fruit grown with your Food for Plants, which has proved a most excellent stimulant, and is certainly the best Manure I have ever used. It is cleanly to use, creates no fungus, and has no unpleasant odour; in fact, no gardener should be without it. Please send me another cwt. and oblige,

Yours truly, WM. McILROY, Gardener to G. W. WOLFF, Esq.

LEIGHTON GARDENS, WELSHPOOL, 7th January, 1892.

Now that I have used Mr. William Bull's Food for Plants over twelve months, I have very great pleasure in stating that I believe it to be the best Plant Manure in the market. It produces fine foliage, large flowers, and gives a good healthy appearance to Stove and Greenhouse Plants in general. I have also used it on Melons, Cucumbers, Tomatoes and Vines with good results, and it is excellent for Chrysanthemums.

WILLIAM ROTHWELL, Gardener to Mrs. NAYLOR.

FORDE ABBEY, CHARD, 27th January, 1894.

Dear Sir,—I think most highly of your Plant Food. It is splendid for all kinds of pot-stuff, and especially that which needs a strong Manure. It is grand for Chrysanthemums and all kinds of Winter-blooming plants.

Yours truly, JOHN CROOK, Gardener to W. H. EVANS, Esq.
